DETAILED ACTION

1. This Office action is in response to the application filed by Joel Astruc et al. on 9/30/06 for the invention titled "AIRCRAFT FLIGHT SAFETY DEVICE AND METHOD WHICH ARE INTENDED FOR AN AIRCRAFT FLYING IN INSTRUMENT METEOROLOGICAL CONDITIONS AND WHICH ARE USED INDEPENDENTLY OF INSTRUMENT FLIGHT INFRASTRUCTURE". 181

Information Disclosure Statement

2. The information disclosure statements (IDS) submitted on 10/17/05 and 1/17/06 have been fully considered by the Examiner as indicated by the accompanying initialed copies of Applicant's form PTO-1449.

Specification

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.

- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Drawings

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed subject matter of new claims 9-16 must be shown in great enough detail to enable one of ordinary skill in the art to actually make and use the invention, or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's independent claim 9, lines 16-25 recite that "while following the route and independently of any instrument flight infrastructure", making-safe operations are performed as part of step c) onboard the aircraft and that this is done "automatically" by α) "verifying" the safety of the actual route, and β) "verifying" the safety of the aircraft flight relative to parameters acquired aboard the aircraft", however Applicant has not particularly pointed out and distinctly claimed the manner or steps by which the

"verification of the safety of the aircraft" is accomplished with respect to the parameters and actual flight terrain.

Lines 13-14 of claim 15 further recite "the apparatus (1) being suitable for implementing the method according to claim 9", and is therefore also considered to be indefinite for incorporating the deficiencies of independent claim 9.

Remaining dependent claims are included in this rejection because they depend from an indefinite base claim and are therefore also considered to be indefinite.
